Wrap Your Vehicle in a Cloak of Invisibility with this Radar/ Laser Jammer

When this jammer receives an X, K or Ka radar signal, it mixes the signal with white noise and reflects it back to the radar gun where the added noise confuses the computer inside the radar gun and produces a blank reading. In addition to making your vehicle electronically invisible to radar, a special modulated laser beam confuses laser guns producing the same effect. Works best when used in conjunction with your existing radar/laser detector, as radar may punch through at ranges of 300 feet or less. Home Electrolysis Kit Removes Hair Permanently

Why keep shaving and waxing when you can gently and permanently remove hair in the privacy of your own home with electrolysis? Salons have used electrolysis to remove hair from the lip, eyebrow, chin, chest, bikini line and more. Electrolysis works by sending a very mild electrical current to the base of the hair follicle so that it never grows back again. Consult a doctor before use if you have Diabetes, Hepatitis, blood disorders, pigmentation problems, Lupus, Scleroderma, Impetigo, chronic skin disorders or scar easily. Do not use if you are pregnant or have a pacemaker.
